Construction Progressing on First Home Built in Arcadia's 56 Palms

PHOENIX, Ariz. (January 22, 2014) Framing is complete on the first of only three homes to be built in 56 Palms, a private, custom home community located in the heart of Phoenix's Arcadia neighborhood.

TDLC Development began construction on the 4,500 square-foot home in late 2013, demonstrating the potential of the more than half-acre homesites. Once complete this home will feature four bedrooms, 4.5 bathrooms, a four-car garage and the finest interior and exterior finishings. Most significantly, this home represents one of the few opportunities to own a new, custom built home in one of Phoenix's most prestigious neighborhoods.

The final two homesites available for purchase in this secluded, yet centrally located community are 28,000 square feet. Homes built on the properties can range from 4,500-5,500 square feet. Interested parties should contact Mike Messenger at mmessenger@gherealty.com or (480) 315-6711.

About TDLC Development

TDLC provides a wide variety of residential and commercial development and building services to clients across Arizona and Southern California. From raw land development to construction oversight to ongoing project management, TDLC has demonstrated thoughtful design, solid management and quality construction across a diverse cross section of projects.

TDLC was a partner in another well-known property within Arcadia located at 66th Street and Camelback and has built numerous custom homes throughout Scottsdale, Phoenix, Paradise Valley and Prescott.
